"Weave - Information for applicants" (version No. 3) is valid for all applications of the Slovenian part of Weave research projects submitted according to this information from September 15th, 2023 onwards.

The Slovenian Research and Innovation Agency reserves the right to amend or supplement this document ("Weave - information for applicants").

1. General Provisions

Based on Article 34 of the Scientific Research and Innovation Activities Act¹ in connection with Article 12 of ZZrID and on the basis of Articles 83 and 102 of the General act on (co)financing and evaluation procedures and monitoring of the implementation of scientific research activities² in connection with Article 47 paragraph 5 of the Decision on the establishment of the Slovenian Research and Innovation Agency³, Methodology for evaluating applications in procedures for (co)financing of scientific research activities⁴ in connection with Multilateral Lead Agency Agreement⁵ the Slovenian Research and Innovation Agency (hereinafter: ARIS) publishes on its website a more detailed information for applicants regarding the application for the conclusion of a contract on implementation and (co)financing of scientific research activity by ARIS.

Signatories to the Multilateral Lead Agency Agreement, including ARIS, have committed to consider proposals submitted under the Weave scheme either as Lead Agencies or as Partner Agencies.

2. What is Weave?

Weave is a financing scheme developed by European research funders to support excellent collaborative research projects across borders.

Weave aims to simplify the submission and selection procedure of collaborative research proposals involving researchers from up to three European countries or regions through a single evaluation of the proposals, which reduces the administrative burden for the applicants. Moreover, Weave enables researchers to collaborate across borders.

Following the Multilateral Lead Agency Agreement, two or three research funding agencies from different countries/regions enable researchers to submit a joint proposal for the Weave research project at the Lead agency, i.e. the research funding agency responsible for carrying out the evaluation process of the joint proposal of the Weave research project.

The coordinating applicant submits a joint Weave research project proposal to the Lead Agency under the conditions set by the Lead Agency. A Weave research project can be bilateral or trilateral. Other co-applicants submit the application of their national/regional part of the Weave research project to the Partner Agencies under the conditions set by the Partner Agencies.

Weave makes use of existing funding schemes open to national/regional research projects and to Weave project proposals under the Multilateral Lead Agency Agreement. Agencies involved in (co)funding Weave research projects only provide funding within their national or regional borders.

¹ The Official Gazette of the Republic of Slovenia, No. 186/21 and 40/23, hereinafter: ZZrID.

² The Official Gazette of the Republic of Slovenia, No. 166/22, hereinafter: General Act.

³ The Official Gazette of the Republic of Slovenia, No. 48/23.

⁴ No. 6319-5/2022-5 from 9/1/2023, No. 6319-5/2022-6 from 17/1/2023 and No. 6319-5/2022-7 from 19/6/2023, hereinafter: Methodology.

⁵ Multilateral Lead Agency Agreement (MLA), No. 020-5/2020-1, hereinafter: Multilateral Lead Agency Agreement.

3. Lead Agency Principle

Weave is based on the Lead Agency Procedure principle. According to the Multilateral Lead Agency Agreement, two or three agencies from different countries enable researchers to jointly apply for a Weave research project to the Lead Agency, i.e. to the agency that conducts the evaluation process of the joint proposal of the Weave research project. The principle of the Lead Agency presents a significant administrative relief for applicants of Weave research projects since the evaluation process of the joint proposals of the Weave research projects is carried out only by the **Lead Agency**. When the joint proposal of the Weave research project is assessed as successful in the evaluation process and is proposed for (co)funding by the Lead Agency, the participating **Partner Agencies** generally recognize the results of the evaluation process and take over the (co)funding of its national/regional parts of the Weave research project without an additional evaluation process.

The team of applicants determine a coordinating applicant, who submits the joint proposal of the Weave research project to the Lead Agency. The other co-applicants have to submit a copy of the joint proposal of the Weave research project and an application to their respective national/regional funding agency (Partner Agency) under the conditions set by the Partner Agency.

3.1. How to choose the Lead Agency

Co-applicants can freely choose the Lead Agency. All co-applicants are expected to make significant and complementary contributions to the Weave joint research project. A joint Weave research project proposal must have a common research question and a common research plan, and the individual national/regional parts of the joint research project must be closely related and complementary. The scientific contribution of each side must be clearly visible.

4. Which countries/regions are involved?

ARIS is one of twelve European research funding agencies⁶ that signed the Multilateral Lead Agency Agreement in 2020 with the possibility of other Partner Agencies joining in the future.

The signatories of the Multilateral Lead Agency Agreement committed themselves to establishing mutual cooperation within the framework of the Weave scheme within the five-year transition period. That being said, the Weave scheme will be rolled out gradually, meaning that all possible combinations of cooperation will not be possible immediately, but will be rolled out gradually.

The updated status of possible collaboration combinations between selected partners is available on the Weave website: www.weave-research.net

Within Weave, ARIS currently directly co-operates with the following research funding organizations:

⁶ ARIS, DFG, FNR, Formas, FRS-FNRS, FWF, FWO, GAČR, HRZZ, NCN, RCN, SNSF; www.weave-research.net

Table 1: List of funding agencies in cooperation with ARIS with their acronyms

Austria	FWF – The Austrian Science Fund
Belgium / Flanders	FWO – Research Foundation Flanders
Croatia	HRZZ - Croatian Science Foundation
Czech Republic	GAČR – Czech Science Foundation
Luxembourg	FNR – Luxemburg National Research Fund
Poland	NCN – National Science Centre
Switzerland	SNSF – Swiss National Science Foundation

Cooperation according to the Lead Agency principle in the Republic of Slovenia is possible in both ways, specifically:

- ARIS can act as a Lead Agency (Chapter 5 of this document) or

- ARIS can act as a Partner Agency (Chapter 6 of this document).

5. ARIS as Lead Agency

Applicants in Slovenia can submit their proposal for a joint Weave research project with partners from either one or two of the countries/regions (listed in Table 1) to the **national call for research projects** where ARIS acts as the Lead Agency. Please note that during the five-year transition period, only joint proposals for Weave research projects with partners from the countries listed in Table 1 are possible.

More information including conditions, possible collaborations, and submission procedure on calls in which ARIS acts as Lead Agency are available on the ARIS webpage: www.aris-rs.si/sl/progproj/rproj/

6. ARIS as Partner Agency

When ARIS is acting as Partner Agency the submission of bilateral joint proposals of Weave research projects is possible with Austria (FWF), Croatia (HRZZ), Czech Republic (GAČR), Flanders (FWO), Luxembourg (FNR), Poland (NCN) and Switzerland (SNSF) and the submission of trilateral joint proposals of Weave research projects is possible in combinations listed in Table 2.

The joint bilateral Weave research project is funded by the Lead Agency and ARIS as a Partner Agency. The joint trilateral research project is funded by the Lead Agency, ARIS as a second Partner Agency, and a collaborating third Partner Agency. In both cases, each agency finances its national/regional part.

Table 2: Possible trilateral submissions for joint projects (ARIS as Partner Agency)

Lead Agency / Country (+ ARIS as Partner Agency)	Additional Partner Agency / Country
Austria (FWF)	Luxembourg (FNR), Poland (NCN), Switzerland (SNSF), Czech Republic (GAČR), Flanders (FWO), Deutschland (DFG)
Croatia (HRZZ)	Switzerland (SNSF)
Czech Republic (GAČR)	Austria (FWF), Luxembourg (FNR), Germany (DFG), Poland (NCN), Switzerland (SNSF)
Flanders (FWO)	Austria (FWF), Germany (DFG), Luxembourg (FNR), Poland (NCN), Switzerland (SNSF), Sweden (FORMAS), Wallonia (FRS-FNRS)
Luxembourg (FNR)	Austria (FWF), Czech Republic (GAČR), Flanders (FWO), Poland (NCN), Germany (DFG), Switzerland (SNSF), Sweden (FORMAS), Wallonia (FRS-FNRS)
Poland (NCN)	Luxembourg (FNR), Switzerland (SNSF), Czech Republic (GAČR), Flanders (FWO), Deutschland (DFG), Austria (FWF)
Switzerland (SNSF)	Austria (FWF), Croatia (HRZZ), Czech Republic (GAČR), Flanders (FWO), Germany (DFG), Luxembourg (FNR), Poland (NCN), Sweden (FORMAS), Wallonia (FRS-FNRS)

For updated collaboration combinations please consult with the agency that acts as Lead Agency on a given call, the ARIS, or check the Weave website: <https://weave-research.net/find-your-funding/>

6.1. Project Duration (Slovenian part of the Weave research project)

The duration of the Weave research project depends on which agencies are involved in the Weave research project joint proposal. The maximum duration allowed is defined under the rules of the call published by the agency acting as the Lead Agency or is determined by the agency that allows the shortest project duration.

Information regarding the maximum project duration of the Weave research project can be seen in Table 3.

Table 3: Maximum project duration (ARIS as Partner Agency)

Austria (FWF)	Up to 4 years
Croatia (HRZZ)	Up to 4 years

Czech Republic (GAČR)	Up to 3 years
Flanders (FWO)	Up to 4 years
Luxembourg (FNR)	Up to 3 years (up to 4 years, if doctoral students included)
Poland (NCN)	Up to 4 years
Switzerland (SNSF)	Up to 4 years

6.2. Cost calculation (Slovenian part of the Weave research project)

Individual national/regional research parts of the Weave project are separately (co)funded by each national/regional research funding agency according to its own rules. The costs or requested funds of the individual national/regional part of the Weave research project are calculated by the guidelines of the research funding agency - cofinancer that finances the individual national/regional part of the Weave research project.

For the Slovenian part of the Weave research project with ARIS as a Partner Agency, the following must be considered:

1. Eligible project costs are determined following the Regulation on the financing of scientific research activities from the Budget of the Republic of Slovenia⁷.
2. In the application, the applicant must state the total amount of requested (co)funding for each national/regional part of the Weave research project expressed in EUR, which must be the same as the amounts stated in the joint application of the Weave research project (except in the following cases).

ARIS considers that for each currency, the amount of research project funds requested from the Lead and Partner Agencies is converted into EUR at the exchange rate published by the Lead Agency. If the Lead Agency does not publish an exchange rate, the conversion will be done at the rate published by the ARIS on its website. In this case, the conversion from foreign currency to EUR is done at the exchange rate published by the Bank of Slovenia⁸ on the first day when it is possible to apply for the Slovenian part of the Weave joint research project to ARIS.

If ARIS finds a discrepancy in the data between the application form and the joint application submitted to the Lead Agency regarding the requested funds, which is greater than the permitted deviation of + / -3%, the ARIS takes into account the amount from the joint application that was submitted to the Lead Agency, calculated according to the exchange rate published by the ARIS on its website⁹, taking into account the maximum amount of (co)financing of the Slovenian part of the Weave research project.

3. The funding requested in total (for the entire period of implementation of the research project) as indicated by the applicant on the ARIS as Partner Agency application form WEAVE-“LEAD AGENCY

⁷ The Official Gazette of the Republic of Slovenia, No. 35/22 and 144/22, hereinafter: Regulation.

⁸ Bank of Slovenia exchange rates - ECB reference rates.

⁹ Same as footnote No. 8.

ACRONYM"/year¹⁰, is converted by the ARIS into the equivalent of full time employment (FTE) at the valid price of the equivalent of full-time employment (FTE) on the day of adoption of the director of the ARIS decision and is authoritative for the entire period of (co)financing of the research project. The volume of financial resources is coordinated with the valid price of the equivalent of full-time employment for an individual year.

4. ARIS (co)finances the Slovenian part of the Weave research project considering budgetary options in the financial plan and work programme of ARIS.

5. ARIS (co)finances the Slovenian part of the Weave research project only if all participating Partner Agencies accept their national/regional part of the joint Weave research project for (co)financing.

6.3. How to submit a proposal for the Weave research project?

6.3.1. Submitting the joint (main) proposal of the Weave research project at the Lead Agency

Joint proposals for the Weave research projects must be prepared by the formal guidelines of the Lead Agency¹¹. The project description must have a common research question and a common research plan, and the individual national/regional parts of the joint research project must be closely related and complementary. The scientific contribution of each side must be clearly visible.

For details, please consult the information provided by the respective Lead Agency:

6.3.2. Submitting the application of the Slovenian part of the Weave research project at ARIS acting as a Partner Agency

Before submitting your application for the Slovenian part of the Weave research project to ARIS as Partner Agency please consult the following applicable legislation:

- ZZrID¹²,
- General Act ¹³,
- Regulation¹⁴,
- Methodology¹⁵,
- Criteria for determining compliance with the demonstration of internationally comparable research results and the period covered by internationally comparable research results for the head of the research project and programme (hereinafter: Criteria)¹⁶,
- Multilateral Lead Agency Agreement¹⁷.

In the event of possible discrepancies between this information and the above-mentioned applicable laws and regulations, the provisions of the above-mentioned applicable laws and regulations shall prevail.

6.3.2.1. Entities eligible to apply

The applicants for the Slovenian part of the Weave research project can be either research organizations registered in the database of research and development activity providers (hereinafter referred to as: the RO records) or private researchers registered in the register of private researchers that is kept by the ARIS, and that meet the requirements set out in the Scientific Research and Innovation Activities Act (ZZrID) and other ARIS rules and regulations.

¹² The Official Gazette of the Republic of Slovenia, No. 186/21.

¹³ The Official Gazette of the Republic of Slovenia, No. 166/22.

¹⁴ The Official Gazette of the Republic of Slovenia, No. 35/22 and 144/22.

¹⁵ No. 6319-5/2022-5 from 9/1/2023 and No. 6319-5/2022-6 from 17/1/2023.

¹⁶ No. 007-5/2022-3 from 16/5/2022 and No. 007-1/2023-1 from 2/2/2023, hereinafter: Criteria.

¹⁷ Multilateral Lead Agency Agreement (MLA), No. 020-5/2020-1.

The Slovenian part of the Weave research project is carried out by a project group comprising the project leader, researchers, and technical associates.

If there are several providers of research activities collaborating on the Slovenian part of the Weave research project, the applicant is the parent RO. The parent RO is the RO that submits the application of the Slovenian part of the Weave research project to the ARIS, is listed first on the ARIS application form¹⁸, and employs the project leader of the Slovenian part of the Weave research project upon signing the contract on implementation and (co)financing of scientific research activity.

6.3.2.2. Application documents

When ARIS acts as a Partner Agency, the application of the Slovenian part of the Weave research project to ARIS must contain the following completed and signed forms and documents:

- Application form WEAVE-“LEAD AGENCY ACRONYM”/year¹⁹, available on the ARIS DigitalForms web portal (<https://digitalforms.arrs.si/>),
- other required forms, which are determined by ARIS on the application form WEAVE-“LEAD AGENCY ACRONYM”/year,
- a copy of the joint (main) application form of the Weave research project submitted to the Lead Agency.

6.3.2.3. Means and form of application

The application for the Slovenian part of the Weave research project must be completed and submitted electronically to the ARIS DigitalForms web portal (<https://digitalforms.arrs.si/>).

A submitted application is deemed formally complete if it is signed digitally (no digital signature certificate is required) by the applicant’s representative (or authorised person) and the project leader of the Slovenian part of the Weave research project. The application is considered formally complete if it is submitted using the prescribed forms and contains all the required information and attachments, as defined in item 6.3.2.2. of this information. Incomplete applications will be processed in accordance with Article 22 of the General Act.

¹⁸ See pt. 6.3.2.2. of this information.

¹⁹ The ARIS application form for each respective Lead Agency call where ARIS acts as a Partner Agency is named in the following way: WEAVE-“LEAD AGENCY ACRONYM”/year, where »LEAD AGENCY ACRONYM« stands for acronyms of cooperating agencies (see Table 1) and »year« stands for the year when the Lead Agency call is published by the Lead Agency. For example the ARIS application form named WEAVE-FWO/2023 must be used for the Slovenian part of the proposal in which FWO is acting as the Lead Agency in connection with the call launched by FWO in 2023.

6.3.2.4. Application submission deadline

The deadline for submitting the application of the Slovenian part of the Weave research project depends on the choice of the Lead Agency and the involved partner agencies.

Information regarding the deadlines for submission of the joint proposal of the Weave research project to each Lead Agency is available on the dedicated Weave website: www.weave-research.net and at the links listed in Table 4.

When submitting the Slovenian part of the Weave research project application, the following must be considered:

1. The **joint proposal** of the Weave research project must be submitted **to the Lead Agency** under the conditions and by the deadline set by the Lead Agency.
2. **The application for the Slovenian part of the Weave research project must be submitted to ARIS** (see item 6.3.2. of this information) **within the same deadline as set by the Lead Agency for submitting the joint proposal of the Weave research project**. In the case of **permanently open calls** at the Lead Agency the application for the Slovenian part of the Weave research project must be submitted **within seven days** after submitting the joint proposal of the Weave research project at the Lead Agency.
3. In addition, the applicant must submit a **copy of the joint proposal** of the Weave research project to ARIS **within seven days** after the expiration of the application deadline set by the Lead Agency or, in the case of permanently open calls, **within the same deadline** as the application of the Slovenian part of the Weave research project.

The application of the Slovenian part of the Weave research project is considered timely if it is completed and submitted on the ARIS DigitalForms web portal, as specified in item 2 of the previous paragraph of this information. If the applicant does not submit a copy of the joint proposal of the Weave research project that was submitted to the Lead Agency within the deadline specified in item 3 of the previous paragraph of this information, it is deemed a formally incomplete application. Incomplete applications will be processed in accordance with Article 22 of the General Act.

Applications of the Slovenian part of the Weave research project will be opened no later than eight days after the deadline for submitting the applications or the Slovenian part of the Weave research project or, in the case of permanently open calls, no later than 30 days after receiving the application for the Slovenian part of the Weave research project. The ARIS' Official opens the electronic applications of the Slovenian part of the Weave research project by recording the list of applications received within the electronic application system and evidence that the applications were late. In the case of an untimely application, ARIS informs the applicant of the Slovenian part of the Weave research project by means of an accompanying letter that it will not further process the untimely application.

6.3.2.5. Conditions for submitting an application

6.3.2.5.1. Entry conditions

The applicant of the application for the Slovenian part of the Weave research project (hereinafter: the applicant) must be an eligible entity (in accordance with item 6.3.2.1. of this information).

The project leader of the Slovenian part of the Weave research project (hereinafter: the project leader) must have a researcher's record number, which means that he or she is registered in the database of research and development activity providers or the register of private researchers at ARIS. The project leader, who does not yet have an assigned researcher's record number, must (in order to gain access to the DigitalForms web portal) complete and submit a form for obtaining a researcher's record number to the ARIS in time, which must be accompanied by a statement on the intention of employment, signed by the applicant and the project leader.

The project leader must have an education obtained from a third-level study programme or an education that corresponds to the level of education obtained from a third-level study programme and, in accordance with the law governing the Slovenian framework of qualifications, is ranked at level 10, and demonstrate international comparable research results in accordance with the ZZrID, the General Act, the Criteria and the Methodology.

Quantitative grades for each evaluation factor (A1 and CI) and each scientific discipline defined in the Methodology are obtained and calculated by the Agency. To calculate the quantitative grade, ARIS will use the data entered into the SICRIS (COBISS) databases and ARIS's records on the day of the expiration of the deadline for application submission at the Lead Agency (A1) or on the day of the last data capture in the SICRIS (COBISS) database prior to the day of the expiration of the deadline for application submission at the Lead Agency (CI). For permanently open calls, ARIS will use the data entered into the SICRIS (COBISS) databases and ARIS's records on the day of each opening of the applications for the Slovenian part of the Weave research project (A1) or on the day of the last data capture in the SICRIS (COBISS) database prior to the day of each opening of applications for the Slovenian part of the Weave research project (CI).

To evaluate bibliographic indicators of a researcher's research performance (calculation of quantitative assessments), researchers themselves must, through an authorized library, timely enter the researcher's record number from the database of research and development activity providers that is maintained by the ARIS, into the normative record for the author in the CONOR.SI normative database.

The project leader can only be a researcher who, on the day the deadline for submission at the Lead Agency expires (in the case of permanently open calls, the day of submission of the joint proposal at the Lead Agency), is the leader of only one project, which is (co)financed in an amount greater than 50.000,00 EUR per year, whereby the annual amount of (co)financing refers to the year when the research project is carried out throughout the duration of the whole year. This limitation also includes research projects with an extended deadline for the completion of the research project based on Article 81 of the General Act.

A researcher may apply to ARIS as a project leader for one research project only within each open call of the agency acting as the Lead Agency. In the case of permanently open calls at the Lead Agency, one application to ARIS per researcher and per individual call in the evaluation procedure determined by the Lead Agency at the same time is allowed.

Researchers who have received a negative grade on a final report for a project - in which they were project leaders in the period of three years prior to the year when the applications for the Slovenian part of the Weave research project were enabled - cannot apply as project leaders on this call.

The research project may only be a basic project.

The period of implementation of the Slovenian part of the Weave research project may be a maximum of four years²⁰.

The Slovenian part of the Weave research project may not exceed 100.000,00 EUR per year for projects lasting two or three years, and 75.000,00 EUR per year for projects lasting four years.

The joint proposal of the Weave research project must be submitted to the agency acting as Lead Agency. A joint Weave research project proposal must have a common research question and a common research plan, and the individual national/regional parts of the joint research project must be closely related and complementary. The joint proposal of the Weave research project must meet the conditions set by the agency acting as Lead Agency. The project leader of the individual national/regional part of the Weave research project, indicated in the joint application of the Weave research project submitted to the Lead Agency, must be the same as the project leader of the individual national/regional part of the Weave research project, indicated in the application of the Slovenian part of the Weave research project.

In the application, the applicant must state the total amount of requested (co)funding for each national/regional part of the Weave research project expressed in EUR, which must be the same as the amounts stated in the joint application of the Weave research project. ARIS considers that for each currency, the amount of research project funds requested from the Lead and Partner Agencies is converted into EUR at the exchange rate published by the Lead Agency. If the Lead Agency does not publish an exchange rate, the conversion will be done at the rate published by the ARIS on its website. In this case, the conversion from foreign currency to EUR is done at the exchange rate published by the Bank of Slovenia²¹ on the first day when it is possible to apply for the Slovenian part of the Weave joint research project to ARIS. If ARIS finds a discrepancy in the data between the application form and the joint application submitted to the Lead Agency regarding the requested funds, which is greater than the permitted deviation of + / -3%, the ARIS takes into account the amount from the joint application that was submitted to the Lead Agency, calculated according to the exchange rate published by the ARIS on its website²², taking into account the maximum amount of (co)financing of the Slovenian part of the Weave research project.

Applicants of Weave research projects, who are engaged in economic activity, regardless of their legal status or legal organizational form, and participate in the Weave research project as a contractor, co-

²⁰ See Table 3.

²¹ Bank of Slovenia exchange rates - ECB reference rates.

²² Same as footnote No. 16.

contractor or co-financier of the project, must, in accordance with the applicable rules on state aid in the field of scientific research, submit also completed form for awarding state aid ARIS-DP-LA-xxxx²³.

6.3.2.5.2. Other conditions

Members of the project group of the Slovenian part of the Weave research project (hereinafter: members of the project group) must have a researcher record number at the ARIS, which means that they must be entered into the database of research and development activity providers or the register of private researchers at ARIS.

The project leader and members of the project groups must have available capacities regarding effective research hours to carry out the research project (the maximum permitted capacity for full-time employment is 1700 effective research hours or one FTE) and must be employed by the RO that will carry out the Slovenian part of the Weave project, or have the status of private researcher.

The project leader must have at least 170 effective research hours (0.1 FTE) available annually. A project group member (except for young researchers, doctoral students, financed by other sources, retired researchers, and JRZ heads who may participate in the project with 0 hours) must participate with at least 34 effective research hours (0.02 FTE) available annually.

The project leader must be employed in at least a 20 % of full-time capacity at the RO in the Republic of Slovenia carrying out the Slovenian part of the Weave research project.

The participating RO must be registered in the RO register or register of private researchers and must collaborate with at least 170 effective research hours during the period of the project's implementation, whereby the minimum amount of RO collaboration is 170 effective research hours per annum. During the Slovenian part of the Weave research project's implementation, the number of hours rendered annually by the participating RO can be 0.

The applicant must have a signed agreement with the other participating research organisations (participating RO) on the regulation of mutual rights and obligations.

The Weave joint research project proposal must be ranked among the 20 % of the best-rated research projects in the evaluation process of the Lead agency's call (considering the exception stated in paragraph 3 of point 6.4. of this information) and all participating partner agencies must accept the national/regional part of the Weave joint research project for (co)financing. ARIS will (co)finance the Slovenian part of the Weave research project only if the research project is accepted for (co)financing by the Lead Agency and all participating partner agencies.

6.3.2.5.3. Fulfilment of entry and other conditions

Entry conditions (item 6.3.2.5.1.) must be fulfilled on the day of the deadline determined in the Lead Agency call or, in the case of permanently open calls, on the day of each opening of applications for the Slovenian part of the Weave research project. Evidence regarding the fulfilment of the conditions

²³ Where »xxxx« stands for the year when the Lead Agency call is published by the Lead Agency.

from the twelfth and thirteenth paragraph of item 6.3.2.5.1. are acquired by ARIS from the Lead Agency. If the entry conditions of item 6.3.2.5.1. are not met, the application will be rejected.

Other conditions (item 6.3.2.5.2.) must be fulfilled when the contract on implementation and (co)financing of scientific research activity is concluded with ARIS, except for the condition of free capacity regarding the effective hourly research work of the project leader and members of the project group, which is checked on an annual level and bearing in mind that this condition for the project leader and members of the project group must be met on the day the project starts. If the conditions from item 6.3.2.5.2. are not met, the contract on implementation and (co)financing of scientific research activity will not be concluded.

6.4. Evaluation procedure, funding threshold, and method of (co)financing by ARIS

Only timely and complete proposals that meet the entry conditions from item 6.3.2.5.1. and the entry conditions of the Lead Agency and other Partner Agencies involved will be included in the evaluation process.

The evaluation process will be managed by the respective Lead Agency by its own rules and existing funding schemes. Based on the Multilateral Lead Agency Agreement and considering budgetary options ARIS (co)finances the participation of applicants in Weave research projects, which are ranked among the 20% of the best-rated research projects ((co)financing threshold) in the Lead Agency's call and are accepted by all participating Partner Agencies for (co)financing.

Exceptionally, in the accordance with the Multilateral Lead Agency Agreement, it is also possible to finance projects that are positively assessed but do not reach the 20 % (co)financing threshold, if all involved Partner Agencies agree on that.

The implementation of the evaluation process is taken over by the agency acting as Lead Agency.

After the evaluation process is completed, the Lead Agency informs ARIS about the results of the evaluation process and provides it with a list of applications that are recommended for funding. Applications recommended for funding by the Lead Agency are considered by the scientific council of ARIS. The scientific council of ARIS considers that only applications accepted for (co)financing by all participating Partner Agencies can be (co)financed. Applications for which all participating Partner Agencies have not yet given their consent to (co)financing are considered by the scientific council of ARIS under a condition precedent. The condition precedent will be fulfilled by obtaining the consent of the Partner Agencies. The final decision regarding the (co)financing of applications is taken by the director of the ARIS based on the proposed decision of the scientific council.

A contract on implementation and (co)financing of scientific research activity is concluded by the ARIS with the selected applicant, which regulates in detail the method of (co)financing and other rights, obligations, and responsibilities of the contracting parties.

6.5. Open access to reviewed scientific publications and web access to information about the research project

The applicant is obliged to follow the principles of open access to scientific information in accordance with the ZZrID and the Scientific Research and Innovation Strategy of Slovenia or its individual parts and other regulations governing the field of open science.

Members of the project group must state the RO affiliation, the project number, and the name of the co-financier, Slovenian Research and Innovation Agency (in Slovene: Javna agencija za znanstvenoraziskovalno in inovacijsko dejavnost Republike Slovenije), in reports, when publishing results or in all public presentations of research achievements.

After the Slovenian part of the Weave project is approved for (co)financing, the applicant must create a website or subpage on their ROs website dedicated to the project and enabling the dissemination of its results. The minimum requirements of the website content are: a description of the joint and Slovenian part of the Weave research project's content including basic information about financing, the composition of the project group with links to data in the SICRIS system, the joint and Slovenian part of the project phases and descriptions of their implementation, bibliographical references arising directly from the implementation of the joint and Slovenian part of the Weave research project, as well as the Slovenian Research Agency's logo and logos of other co-financers. Content included in the SICRIS system should be linked and need not be provided twice. The website presenting the joint and Slovenian part of the Weave research project must remain active for five (5) years after the Weave research project has been completed. The implementer reports on the establishment of the website in the interim and final report.

7. Contacts

Please also consult the official Weave website: www.weave-research.net.

Contact persons for clarification of procedures when ARIS acts as a Partner Agency are listed in Table 5.
